#### RESPECT LIFE

When does a baby become a person? Consider this: In the 1973 Roe v. Wade decision that legalized abortion nationwide, the late Supreme Court Justice Harry Blackmun famously said, "If this suggestion of personhood is established, the appellant's case, of course, collapses, for the fetus' right to life would then be guaranteed specifically by the Amendment."

We're there now. Sonograms- 3D, 4D and HD have settled the question of when life begins. We know that at conception, a child has his or her own DNA separate and apart from the mother. We can see the baby's beating heart as early as 18 days. At just 30 days, the developing child has a nervous system. At 12 weeks, the baby has fingernails. At 20 weeks, every major organ has formed, along with tiny toenails and eyebrows. The child can sleep, hear, respond to the mother's voice, and feel pain. Its time to face the truth that personhood has been established.
